About me

Graduate programmer – flexible, multilingual, and experienced in corporate environments, with solid knowledge gained through both personal projects and professional experience.

Recently, I have explored the BPM field, which I find to be broader and more developed than I initially expected, offering excellent business and learning opportunities.

I am currently working as a SAP developer. I began in 2022 as an ABAP programmer and have recently transitioned to more modern BTP technologies.

I am also open to working in various fields, being familiar with technologies like Android Studio, Swift, Java, and VBA. In general, I am always eager to learn new things—whether related to programming, history, sports, or music.

My professional goal is to work in a company where I can contribute to its reputation and value by continuously expanding my knowledge, always relying on innovation and perseverance. I fully understand that in the IT field, continuous learning and adaptability are essential, but I also find this dynamic to be highly motivating.

Skills acquired from questionnaire programming, using IBM SPSS Dimensions :

- o SQL checks to ensure the integrity of the databases.
- o Creation of customized HTML/CSS/JavaScript designs to suit clients specific needs.
- o Support for new hires
- o Analytical thinking, planning and development skills.
- o Able to work under pressure

My responsibilities as ScriptWriter :

- Programming questionnaires using the Dimensions programming language
- Responsible for the logical validation of the programmed questionnaires according to the project specifications
- Generating reports based on online research studies
- Generating HTML pages adapted to the client's need and specifications
- Audio-Video material integration into questionnaires

My responsibilities as a SAP BTP Consultant:

- Developing applications using SAP Build Apps (low-code/no-code environment)

- Creating and customizing applications in SAP Business Application Studio (BAS)
- Designing and configuring Fiori Launchpad environments
- Integrating APIs and external services into SAP BTP applications
- Working with JavaScript and UI5 for frontend development
- Using ABAP for backend logic and data handling when needed
- Managing and administrating SAP BTP accounts and subaccounts
- Establishing secure connectivity between different systems and services within the SAP ecosystem
- Working with SAP HANA and other databases for data modeling and access
- Supporting integration between on-premise and cloud systems
